**N.B.**—This Schedule gives the constructional particulars in English count. (i) Mills have since been asked to switch over to the English count. Where, however, mills use yarn in stock spun under the French count system the French counts of yarn used in the warp and weft of the cloth should be indicated in the 'C' form with the corresponding English count rounded off to the nearest quarter count in brackets; 0.125 and below to be omitted; 0.126 and upto 0.375 to be taken as 0.25; 0.376 and upto 0.625 to be taken as 0.50; 0.626 and upto 0.875 to be taken as 0.75 and 0.876 and upto 0.999 to be taken as 1.00. The weight of yarn in the cloth should be calculated on the basis of French count in the case of mills who have switched over to the French count system. (ii) The adjustment for count variation for mills adopting the French count system shall be made by taking the total of warp and weft counts as rounded off in the manner specified in (i) above. - (iv) where any "dhoty", "saree", "shirting", "longcloth" and "drill" produced by a producer having a spinning plant and packed prior to the 15th April, 1967 is, after sale, subjected to further processing after the 14th April, 1967 by a processor, the maximum ex-factory price of such cloth processed by the processor shall be the maximum ex-factory price stamped thereon increased by the processing charges specified in part III of the schedule.

## SCHEDULE "A-V"

## PART II

## ADJUSTMENTS TO THE BASIC GREY REALISATION MULTIPLIER

## I. Cotton Adjustments

1. Group I—For manufacture of qualities with warp counts 9s to 12s in Group I reduce the multiplier by 11 paise per kg. of total yarn woven, with the count variation applicable to the group.

2. Group III—For manufacture of qualities with 17s to 19s warp counts reduce the multiplier for Group III by 8 paise per kg. of total yarn woven, with the count variation applicable to the group.

3. Groups IV and V.—(a) Qualities with warp counts 23s to 27s will be linked to Group IV with an increase in the multiplier by 42 Paise per kg. of yarn for warp only, with the count variation applicable to the group.

(b) Qualities with weft counts 31s to 33s will be linked to either Group IV or Group V according to the permissible warp counts. An increase of 42 Paise per kg. weft yarn woven in the fabric will be allowed over the multiplier for Group IV if the quality is to be linked to Group IV and over the multiplier for Group V if the quality is to be linked to Group V with the count variation applicable to the relevant group.

(c) Qualities with warp counts 23s to 27s and weft counts 31s to 33s will be linked to Group IV and an increase of 42 paise per kg. of yarn woven will be permissible on the weight of both warp and weft yarn over the multiplier of Group IV, with the count variation applicable to the group.

4. Group VI.—(a) Qualities with warp counts 34s and above from Indian Cotton will be linked to Group VI and an increase of 142 Paise per kg. of warp yarn over the multiplier for Group VI is permissible on the weight of warp yarn only, with the count variation applicable to the group.

(b) Qualities with weft counts 41s and above from Indian cotton will be linked to Group VI and an increase of 142 Paise per kg. of warp yarn over the multiplier for Group VI is permissible on the weight of weft yarn only, with the count variation applicable to the group.

(c) Qualities with warp counts 34s and above and weft counts 41s and above from Indian Cotton will be linked to Group VI and an increase of 142 Paise per kg. of yarn woven over the multiplier for Group VI will be permissible on the weight of both warp and weft yarn, with the count variation applicable to the group.

NOTE: The increase of 142 Paise per kg. of yarn over the multiplier for Group VI specified in (a), (b) and (c) above is permissible only if the yarn is spun from Cambodia (A), CO 2 varieties coming under Cambodia (A) or types of cottons equivalent to or superior to these types.

(d) Allowance for the use of ISC-67 cotton.—Except in cases where the fabrics could be linked directly with group VII or above the following allowance will be admissible for the use of ISC-67 cotton in controlled cloth, provided the conditions specified below are fulfilled:—

(1) Qualities with warp counts 34s and above from 100 per cent ISC 67 cotton will be linked to Group VI and an increase of 328 paise per kg. of warp yarn over the multiplier for Group VI is permissible on the weight of warp yarn only, with the count variation applicable to the group.

(2) Qualities with weft counts 41s and above from 100 per cent ISC 67 cotton will be linked to Group VI and an increase of 328 Paise per kg. of weft yarn over the multiplier for Group VI is permissible on the weight of weft yarn only, with the count variation applicable to the group.

(3) Qualities with warp counts 34s and above and weft counts 41s and above from 100 per cent ISC 67 cotton will be linked to Group VI and the increase of 328 Paise per kg. of yarn woven over the multiplier for Group VI will be permissible on the weight of both warp and weft yarn, with the count variation applicable to the group.

(4A) Mixture of ISC 67 cotton and Foreign cotton.

Mills using a mixture of ISC 67 cotton with foreign cotton, other than foreign 'B' for all fabrics having warp counts of 34s and weft counts 41s will link the fabrics to Group VI only taking the cotton allowance of 328 paise per kg. over the multiplier for Group VI plus the admissible count, reed and pick variations.

Here also foreign 'B' cotton (cotton with staple length below 1-1/16") will not be treated as equal to or superior to the ISC 67 cotton. Mills should give the details of the cotton used for the mixture in the 'C' form. Mills should keep proper records to show the types of foreign cottons used for inspection.

NOTE: The increase of 328 Paise per kg. of yarn over the multiplier for Group VI specified in (1), (2), (3) and (4A) above is permissible only if—

(i) the yarn is spun from 100 per cent ISC 67 cotton or a mixture of ISC 67 cotton with foreign cotton other than foreign 'B' as indicated in (4A) above;

(ii) the minimum reed in the case of controlled cloth other than dhoties and sarees shall be 96. This minimum reed restriction for eligibility of this allowance will not however be applicable in the case of dhoties and sarees.

(a) It is clarified that even if the weft counts fall below 41s, cloth varieties made out of ISC 67 either 100 per cent or in admixture with foreign cotton (except foreign cotton B) may be linked to Group VII provided the warp and weft counts fall within the count ranges prescribed for that Group.

(b) A question was raised as to whether a cloth with warp of 35s and above made out of ISC 67 or Sea Island cotton either 100 per cent or admixture with foreign cotton (other than Foreign B) but with weft of counts below 35s made out of other types of Indian cotton linked to Groups VI or V could be double linked with Groups VII for warp and VI or V for weft. Only cloth where both warp and weft are made out of ISC 67 or mixed with foreign cotton (other than Foreign B) and the counts thereof fall within the permissible ranges for Group VII is to be linked with Group VII. Cloth not answering the above requirements should continue to be linked or double linked with Group VI or lower groups as has been followed prior to 1-10-1966.

(c) In cases of cloth varieties made out of ISC 67 either 100 per cent or in admixture with foreign cotton (other than foreign B) which are combed and linked to Groups VII and above, the combing allowance prescribed in item II(c) of Part II of Schedule "A-V" will be permissible provided the minimum comber loss is 14% as provided therein. If this condition is not satisfied no combing allowance will be admissible even if the cotton is combed.

5. Group XIII—Qualities finer than permissible count ranges for group XIII manufactured out of superior foreign cotton will be linked to Group XIII. An allowance of 157 Paise per kg. of yarn woven will be permissible on the basic grey realisation multiplier. Suitable adjustments for count variation at 11 Paise per count per kg. and also for reed/pick variations will have to be done in the usual manner after adding the cotton allowance specified in this para.

6. Foreign cotton: In cases where foreign cotton is to be used for warp linked to Group V and warp and weft counts linked to Group VI, mills should apply to the Textile Commissioner with full details for fixation of prices. The words "warp and weft" in Group VI would cover warp and weft together or either warp or weft.

- (i) 100% *Foreign cotton*: The cotton allowance will be admissible only for the use of 100 per cent foreign cotton. Foreign cotton 'B' (cotton with staple length below 1-1/16") will not qualify for any allowance. Mills should indicate the types of cotton used and the fabrics made with their constructional particulars and serial numbers which they propose to stamp on the fabrics. On receipt of those details, the permissible cotton allowance will be intimated to the mills concerned.

(ii) *Mixture of Indian and Foreign cotton*:

- (a) No allowance is permissible for mixture of Indian cotton with foreign cotton for cloth qualities linked to Group V.
- (b) Mixture of foreign cotton (other than Foreign 'B' cotton—cotton with staple length below 1-1/16") with Indian cotton for cloth qualities linked to Group VI will qualify for the allowance of 142 Paise per kg. of such yarn used in the fabric (warp or weft or both) subject to the conditions prescribed in 4(a), (b) and (c) above and the note thereunder. It should be noted that no allowance would be admissible even if the cloth is linked to Group VI if the warp count is less than 34s and weft count is less than 41s or where the cotton used is not equivalent to or superior to the Cambodia 'A' and CO 2 varieties coming under Cambodia 'A'.
- (iii) Mills using a mixture of Indian cotton CO 2 and/or Cambodia 'A' with foreign cotton, other than foreign 'B', for all fabrics having warp counts of 34s and above and weft counts 41s and above, even though the permissible counts might relate to Groups higher than Group VI, will link the fabrics to Group VI only taking the cotton allowance of 142 paise per kg. over the multiplier, for group VI plus the admissible count, reed and pick variations. Here also foreign 'B' cotton (cotton with staple length below 1-1/16") will not be treated as equal to or superior to the CO 2 or Cambodia 'A' cotton. Mills should give the details of the cotton used for the mixture in the 'C' form. Mills should keep proper records to show the types of foreign cottons used for inspection.

7. *Re-wound warp yarn used as weft in fabrics*: On the question as to whether the case of 36s warp yarn which is linked to Group VI and where the yarn is spun from Cambodia 'A', CO 2 and better types of cotton, if such 36s warp yarn is re-wound and used as weft in the same fabric, the cotton allowance prescribed for warp in item 4 Part II of the Schedule of Multiplier will be permitted in respect of such 36s re-wound warp yarn used as weft in the fabric, this allowance is permissible only if the weft count is 41s and above and since in this case the weft count is only 36s, the cotton allowance will not be permissible. This is an illustration and will apply in all similar cases.

## II. Combing Allowance

- (a) No allowance for combing of cotton for counts below 30s or weft will be permitted.
- (b) Fabrics linked to Groups V and VI of counts 30s and above will be eligible for combing allowance at 55 paise per Kg. of combed yarn used in the fabric, provided that the following conditions are fulfilled.
- (1) The minimum comber loss in respect of the counts specified above shall be 10 per cent.
  - (2) The minimum reed, in the case of long-cloth and shirting shall be 72.
  - (3) The minimum reed in the case of dhoties and sarees shall be 44.
  - (4) Both the warp yarn and the weft yarn in the fabric should be combed yarn.

NOTE: (i) For claiming the Combing Allowance the count should be 30s and above both in warp and weft.

- (ii) Where for the body of the fabric no combing allowance is admissible either because carded yarn is used or combed yarn is not used both in warp and weft or the minimum count and/or reed specification is not complied with, or the minimum Comber loss is not obtained, border yarn also will not be entitled to any combing allowance even if it is combed yarn.
- (c) Fabrics linked to Groups VII, VIII and IX in Part I of Schedule A-V will be eligible for combing allowance at 85 paise per Kg. of combed yarn used in the fabric either in the warp or weft or both as the case may be. For fabrics linked to Group X the combing allowance will be 105 paise per Kg. of combed yarn used in the fabric in the warp or weft or both as the case may be. These allowances are admissible provided the minimum comber loss is 14 per cent.
- (d) The multipliers in respect of Groups XI and above are based on combed cotton. If carded yarn qualities are used in fabrics linked to Groups XI and above in warp or weft or both, a reduction of 112 paise per Kg. of carded yarn used in the fabric should be effected in the Multipliers. Mills requiring price fixation for qualities manufactured with carded yarn and linked to Groups XI and above should approach the Textile Commissioner.

## III. Method of Linking

1. All varieties of cloth falling under controlled categories manufactured by mills shall be linked with one or the other groups mentioned in Part I of Schedule A-V.

2. The linking shall be made according to the counts of warp and weft falling within the permissible count variation specified in columns 6 and 7 of Part I of Schedule 'A-V'. Where the warp and weft counts of a fabric fall within the permissible range of warp and weft counts in a group, the fabric should be linked to that group only.

3. (i) The basic adjustments between count for cloth in each combination of counts shall be arrived at for the composite counts and is to be applied to the total weight of yarn in warp and weft only without any addition. In other words, actual yarn weight in both warp and weft of any cloth shall be worked out on the counts of yarn used in the cloth.

(ii) Calculation on fractions of counts shall not be permitted except as specified in Notes under Part I of Schedule 'A-V'.

(iii) Weight of weft should be calculated on the actual loom state length and not on the finished length of the piece.

(iv) Wherever the count of weft is coarser than the count of warp separate linking for warp and weft with appropriate groups of multipliers will be permitted provided the weft is spun from appropriate cotton and provided also that such counts of weft are selected from the next lower group.

(v) Wherever the count of weft is finer than the count of warp even beyond the counts of weft permitted under particular group in Part I of the Schedule 'A-V', separate linking for warp and weft with appropriate group of multiplier will be permitted provided the weft is spun from appropriate cotton of the higher group and the minimum standard for picks is approved by the Textile Commissioner and provided further that such counts of weft are selected from a higher group immediately next.

NOTE: (i) There are certain warp and weft counts which overlap in more than one Group. For instance, weft counts 13s-20s will come under Group II and also in Group III. Here the Group to which the warp of the cloth is linked will determine the group to which the weft should be linked. For instance in the case of cloth having 18s warp and 14s weft, the warp count 18s will be linked to group No. III in accordance with item No. 2 of 'Cotton Adjustments'—Part II of Schedule 'A-V'. The weft count of 14s although occurring in Group II and III will be linked to Group No. III only as the warp is linked to that group.

(ii) **Double linking:** There are certain qualities which will permit linking of warp and weft to separate groups. For instance a quality of 12s warp and 16s weft 44 reed and 40s picks will be linked to Group I for warp and Group II for weft. In such cases of separate linking, the calculation of the price will be as under:—

(a) 12s warp will be linked to Group I as under:  
 Standard 14s  $\times$  10s  $\times$  40 reed  $\times$  40 picks.

Quality 12s  $\times$  12s  $\times$  44 reed  $\times$  40 picks

(b) 16s weft will be linked to Group as under:  
 Standard 14s  $\times$  14s  $\times$  44 reed  $\times$  44 picks

Quality 16s  $\times$  16s  $\times$  44 reed  $\times$  40 picks

Adjustments for counts and reed and picks will be made for the separate groupings and the final multiplier for warp will be multiplied by the warp weight, and final multiplier for weft will be multiplied by the weft weight to arrive at the price of the piece.

(iii) It will be permissible to deviate from the prescription given in (iv) and (v) above and take the weft count from a group even lower than the next lower group or higher than the next higher group. For example a quality of 18s warp and 12s weft will be linked to Group III for warp and Group I for weft. This linking will, however, be subject to the observance of production control restrictions.

4. The basis realisation multiplier shall be adjusted, wherever necessary, in the following manner:—

(a) Adjustment for cotton (cotton allowance), see Part II of Schedule 'A-V'.

(b) Combing allowance, see Part II of Schedule 'A-V'.

(c) **Narrow width allowance:**—Part I of Schedule 'A-V' applies fairly uniformly for all grey qualities of 78 cms. and over and for all bleached dyed and finished qualities of width 71 cms. and over.

For widths lower than 76 cms. grey or 71 cms. bleached, dyed or finished the multipliers given in the above schedule shall be increased as under:

(i) Groups I to V 18 paise per kg. of yarn woven

(ii) Groups VII and above 16 paise per kg. of yarn woven (Splits should be excluded in all cases).

NB.: In respect of grey calendered sorts, the narrow width allowance has reference to the loom state width and will be allowed only if the width of the cloth is below 76 cms. in the loom state.

(d) Adjustment for count variation—see column 9 of Part I of Schedule 'A-V'.

(e) (i) Adjustment for variation in reed: For every upward variation of 4 reeds and multiples of four reeds, the multiplier specified in column 8 of Part I of Schedule 'A-V' after adjustment as above shall be increased by half per cent. In addition, in the case of qualities linked

to Groups I and II and falling under the 'coarse' category of fabric for every downward variation of 4 reeds and multiples of four reeds, the multiplier specified in column 8 of Part I of Schedule 'A-V' after adjustment as above shall be decreased by half per cent.

(ii) **Variation of picks:** For every upward or downward variation of 4 picks and multiples of four picks, the multiplier specified in column 8 of Part I of Schedule 'A-V' after adjustment as above, shall be increased or decreased by one per cent.

NOTE.—In calculating the percentage adjustments under e(i) and e(ii) above multiples of four only should be adopted, fractions thereof being omitted. The resultant percentage adjustment applying both the reed and pick variations should first be calculated and then applied over the multiplier and not separately for reed and for pick variations.

(f) For all qualities manufactured out of double or more twisted yarn, the appropriate multiplier after adjusting the count, reed and pick allowance shall be decreased by 5 per cent (with a minimum of 35 paise per Kg. of yarn woven) in case both warp and weft yarn are twisted and by 2½ per cent. (with a minimum of 18 paise per kg. of yarn woven) in case either warp or weft yarn is twisted.

(g) The following compensatory allowance for grey cloth is permitted to those mills only who obtain not less than 75% of their motive power by burning coal and/or fuel oil in their own boilers. The allowance is also subject to the conditions stipulated below:—

(i) The allowance shall be equivalent to 2½% of the Realisation Multiplier after the same has been adjusted wherever necessary in accordance with (a) to (f) above.

(ii) The allowance shall apply to the weight of grey yarn only from which the cloth is woven. Any scoured, bleached, dyed, printed or mercerised yarn used in the manufacture of cloth shall be excluded from this allowance.

(iii) For the purpose of ascertaining whether a mill has obtained not less than 75% of their motive power by burning coal and/or fuel oil in their own boilers, the average of the consumption for the previous six monthly period (January to June and July to December) should be taken into account.

NOTE.—(i) Mills who obtain electric power from Electric Supply undertakings, where coal and/or fuel oil is consumed for generation of power, will not be entitled to claim this allowance.

(ii) If grey fabric undergoes subsequent processing such as bleaching, dyeing etc., this 2½% increase will not be applicable on the bleaching, dyeing etc. charges.

5. Dobby allowance for borders in dhoties and sarees:—

	Upto 12 shafts. (Paise per kg.)	From 13 shafts to 32 shafts	From 33 shafts & above.
(a) For warp counts below 36s .. .. .	35	70	105

**NOTE.**—The allowances for Dobby and Jacquard work specified in item 5 and 6 above are to be added on the basis of weight of yarn in warp and border, exclusive of weight of weft yarn. These charges would be permitted for the minimum number of Dobby shafts or Jacquard needles required for the reproduction of the designs.

#### 7. Drop-box allowance.

**NOTE.**—The Drop-box allowance is to be taken on the total weight of yarn warp and weft in the piece. This allowance is permissible only for the minimum number of shuttles required for the reproduction of the pattern.

#### 8. Charges for use of doubled yarn in the border of dhooties and sarees:

- (i) For the purpose of linking border yarn will be treated as distinct from the body of the fabric and the border yarn in all cases will be linked separately to the appropriate group applicable to the basic single count of the border yarn. For the purpose of adjustment for count variation the count of weft will be assumed to be the same as the basic single count of the border yarn. The weight of border yarn will be multiplied by the realisation multiplier of the appropriate group for its basic single count. In addition the doubling charges as under will be permitted.

- (iii) For use of processed doubled yarn in the above qualities, the charges prescribed in item 7 of Part III of Schedule 'A-V' for Processing charges will apply in addition.

**NOTE.**—In case single yarn is used in borders, the border yarn will be linked as indicated in Item '8' on the basis of its basic single count. In addition, 50% of the difference between the multiplier rate for the warp yarn of the fabric and the multiplier

rate for the border yarn will be allowed on the weight of the border yarn provided that the yarn in the border has a minimum lea-strength of not less than 1½ times the lea-strength of the warp yarn in the fabric. The mills will be required to certify the lea-strength of the warp yarn and the lea-strength of the border yarn for this purpose in the C form. Such declared strength will be subject to inspections and check from the enforcement staff. Mills should also keep records of the lea-strength of the warp yarn and the border yarn. The grant of doubling charges will not arise.

- (iv) In addition to the above, the following compensatory allowance may be added to the final prices of dhooties and sarees for loss of production:—

(i) 3 paise per metre in the case of dhooties and sarees manufactured from 14s warp and over and linked to groups upto and including Group VI.

(ii) 5 Paise per metre in the case of dhooties and sarees the warp counts of which are linked to Groups VII and above.

**NOTE.**—(i) Dyeing charges for the use of coloured yarn in the headings of Dhooties and Sarees are not permitted.

(ii) No compensatory allowance as for sarees will be admissible in the case of printed Mulls and Voiles and Dorias, which are offered as sarees under the controlled category.

9. The doubling charges specified in items 8(i), (ii) and (iii) will also apply to other qualities where doubled yarn has been used whether as warp and/or weft.

#### 10. Grandrelle Shirtings:—

For Grandrelle shirtings accepted as controlled cloth the following, adjustments will be necessary in calculating prices:—

- (a) While effecting the adjustments from the basic realisation multiplier the deduction prescribed in the Schedule 'A-V' under item 4(f) in Part III 'Method of Linking' for the use of double or more twisted yarn will not be Necessary.
- (b) Doubling charges prescribed under item 8 in Part III 'Method of Linking' of Schedule 'A-V' will not be admissible.
- (c) Dyeing charges for the processed yarn used in the fabrics having Grandrelle yarn will have to be worked out by adopting the dyeing charges prescribed in the Schedule 'A-V' under item 7 of Part III of Schedule (Schedule of processing charges).

#### 11. Yarn in selvages used in cloths other than Patti Mulls and Voiles:—

Doubled or single yarn, if any, used in selvages of cloth other than Patti Mulls and Voiles should only be treated as falling within the warp yarn used in the cloth and will not be permitted to be taken as border yarn and will not be allowed the special charges for border yarn.

#### 12. Extra allowance for Mulls and Voiles:—

For bleached, dyed or printed mulls and voiles of 44" (112 cms.) width and more and conforming to the following specifications, an additional allowance will be permitted as indicated against the respective qualities:—

(i) Linked to Group VII to IX 4 paise per metre, with minimum 48 reed and 44 Picks.

(ii) Linked to Group X and 5 paise per metre, above with minimum 56 Reed and 48 Picks.

#### 13. Drills.

- (a) Allowance for Production of drills of superior specifications:—

The following allowances will be admissible in the case of drills which conform to or are better than the specifications prescribed by the Director, General of Supplies and Disposals for Defence material.

- (i) A drill allowance of 6 paise per kg. of yarn woven in the fabric. This allowance is applicable both on warp and weft.
- (ii) Cotton allowance at 26 paise per kg. in the case of drills manufactured with 19s warp and below, and at 42 paise per kg. in the case of warp counts above 19s. This cotton allowance is applicable *only on the weight of warp in the fabric*.

NOTE.—While submitting the C forms in respect of drills where the above allowances are claimed, the mills should indicate clearly the specification number to which the drill conforms and also the weight in kg. per square meter of the drills. The mill should also endorse a certificate that the drills to be packed for civil production will be strictly in accordance with such specifications.

(b) Fixation of price for Mineral Khaki Drill—Rejects:—

- (i) In respect of Mineral Khaki Dyed Drill produced for defence and rejected by D.G.S. & D.  $6\frac{1}{2}\%$  below the contract price may be charged and stamped.
- (ii) In respect of Mineral Khaki Dyed Drill rejected by mills themselves, the stamping should be 10% below the contract price.

Where however, the prices arrived at in the above manner are in excess of the prices calculated on the application of Multipliers without the allowances permissible of D.G.S. & D. specifications, mills should charge and stamp only the lower of the two prices *viz.* the prices calculated on the application of the Multipliers without the allowances permissible for D.G.S. & D. specifications.

14 (a) Realisation for use of Rayon (Artificial Silk) yarn in Cotton Cloth :—

For use of artificial silk yarn used in saree borders and as weft for the ground, the following charges will be permissible:—

The art silk yarn will have to be linked to the appropriate count group equivalent to the English cotton count and the multiplier of that group without any adjustment for cotton shall be applied over the weight of the yarn. In addition only the following allowances, to compensate for the differences in prices between art silk yarn (Rayon yarn) and its corresponding cotton yarn count which has been allowed in the multiplier will be permitted:

(b) For other Deniers of Art silk yarn and for the use of staple fibre yarn in fabrics mills may apply to the Textile Commissioner for price fixation giving details of manufacturing particulars.

15. Processing charges will be permissible in accordance with Part III of Schedule "A-V".

16. Allowance on account of seconds, fents, rags, etc.:—

The final price as calculated in accordance with the Schedule Multipliers specified, will be increased as under:—

- (ii) On processed cloth other than printed sorts .. .. . 2.75 per cent.
- (iii) On printed sorts .. .. . 3.75 per cent.

17. The Textile Commissioner, if he is satisfied that due to the nature of machinery and equipment in the undertaking a producer having a spinning plant is not able to produce cloth other than dhoties and sarees, may, in respect of sarees having a border

of width exceeding 3.81 cms. but not exceeding 6.35 cms. and packed in excess of the quantity of dhoti/saree, longcloth and shirting and drill taken together, as prescribed by the Textile Commissioner and on an application made to him in this behalf, specify a price exceeding the ex-factory price specified in Schedule "A-V" by  $2\frac{1}{2}$  per cent.

18. Rounding off of the ex-factory and retail prices should be to the nearest Paise, 0.51 paise and above taken as one paise and 0.50 and below omitted.

SCHEDULE "A-V".

PART III
